EDUCATION

University of Central Florida

Orlando, FL

Bachelor of Science in Computer Science, Minor in Intelligent Robotic Systems

May 2026

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Logic

Organizations: National Society of Black Engineers (NSBE), ColorStack, UCF KnightHacks, SHPE

EXPERIENCE

Software Engineer Intern

May. 2025 – Aug. 2025

Florida Blue

Orlando, FL

- Incoming Software Engineer Intern on Web-Applications Development team.

Data Analytics Developer

Aug. 2024 – Present

National Society of Black Engineers

Orlando, FL

- Developed software to manage water quality for the Pow3r Pump project using **Power BI**.
- Supported the integration of water quality monitoring for hardware deployment by the Automation team.
- Monitored pH levels and turbidity to optimize and enhance the machine learning filtration system performance.

Workshop Coordinator

Aug. 2024 – Present

Knight Hacks

Orlando, FL

- Collaborated with over **15** directors to teach over **100** students in workshops and meetings.
- Helped maintain the organization for hosting events, meetings, and operations for the club.
- Assisted in organizing the 2024 Hackathon where over **300** hackers attended.

Undergraduate Researcher

Aug. 2024 – Present

ISUE Lab

Orlando, FL

- Conducted Human-Computer Interaction-related user studies to assist in research.
- Helped develop study participant-facing VR systems in **Unity**, and collaborated with researchers on papers.

PROJECTS

Formify | *Python, OpenCV, MediaPipe, Flask, HTML, CSS, JavaScript, C++, Arduino*

Oct. 2024

- **1st Place Overall Winner at Knight Hacks 2024 Hackathon**
- Developed a web-accessible program that can monitor a users motion in real time and provide haptic feedback to guide them through prescribed exercises.
- Integrated AI-driven motion analysis, using **OpenCV** to track and evaluate user movements in real-time.
- Embedded **ESP32** microcontrollers to send precise vibrations to guide users through exercises.

My Game List Webpage | *React, Tailwind CSS, TypeScript, Node.js, SQL*

Nov. 2024 – Present

- Developed an interactive webpage enabling users to rank video games and share customizable profiles.
- Implemented **AWS RDS** for storing user profiles, game ratings, discussions, and other relational data.
- Optimized database queries and **API** endpoints for improved website performance.

Specified Item Detector | *Python, YoloV3, OpenCV, TensorFlow, PyTorch*

Aug. 2024 – Nov. 2024

- Designed an AI-powered system capable of accurately identifying and categorizing various objects in real time.
- Implemented **DarkNet**, to enhance the system's ability to recognize and classify various items.
- Optimized the AI to detect the difference between different settings by applying large datasets.

The God's Arena | *C#, Unity*

Aug. 2021 – May 2022

- Developed a 2D platforming game in the 'Metroidvania' genre using the **Unity** Engine.
- Implemented over **10** movement and attack actions showcasing branching options and input handling.
- Designed over **20** enemy types that implement AI thinking, testing/debugging, and unique game-play styles.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, C#, JavaScript/TypeScript, HTML/CSS, SQL

Frameworks: React, Node.js, Angular/AngularJS, MySQL, Flask, OpenCV, PyTorch, TensorFlow, Spring Boot

Tools: Git, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse, Unity, Android Studio, Arduino, Power BI, AWS

Concepts: Software Engineering, Backend, Frontend, Machine Learning, Computer Vision, APIs, REST APIs, AI/ML, Agile Methodologies, Software Development Life Cycle, DevOps
